

SANDSTONE CLASSIC ADELAIDE

Split Face Dressed Edge Random Ashlar Blocks

This stone has a lot to offer; the wavy veining as well as the natural colour variation and texture that typifies sandstone. Not only does the split face add a wonderful softness, but the bolstered edge on this stone also helps frame each piece, defining this stone's random ashlar format. The all-natural colour variation ranges from chalk to mauve, with tans and ochre in between.

GALLERY IMAGES

Natural stone blocks are nominally between 95-110mm thick and are typically used like a brick as a construction element.
