

## **SANDSTONE DOVE GREY PREMIUM**

Textured Random Ashlar Veneers, nominal 20mm

This premium Dove Grey option has had the dark honey colours that naturally occur in this stone filtered out. There of course is still natural colour variation remaining, which creates a soft movement within the overall warm grey impression. The grey colouring in this stone provides a modern contribution to this timeless random ashlar format. And, the textured finish softens the appearance of the veining, leading to a subtly refined look.
