

SANDSTONE SAND DUNE

Textured Random Ashlar Blocks

These sandy/salmon colour natural stone blocks have a textured finish. This finish softens the appearance of the brown veining that organically winds its way through this sandstone.

Please note this option is only available in a natural stone block.

Natural stone blocks are nominally between 95-110mm thick and typically used like a brick as a construction element.

Please note minimum quantities and extended lead times may apply, contact us for more information.
