

SANDSTONE SA BASKET RANGE

Peck Face Random Lengths, 76, 162, 248mm (H) Blocks, nominal 110mm + protrusion

One of our local South Australian natural stone options, this sandstone comes out of the Adelaide Hills. A coarse grain sandstone, which comes out of the ground including a range in colours from light sandy colours to rich brown and blacks. There are several 'peck face' finishes that the Basket Range quarry can produce, each one is hand crafted, meaning it has its own unique character.

Natural stone blocks are nominally between 95-110mm thick typically used like a brick as a construction element. Basket Range Sandstone is quarried to order, contact us to find out lead times.
