SANDSTONE SA ADELAIDE HILLS

Quarry Face Random Lengths, 76, 162, 248mm (H) Blocks, nominal 110mm + protrusion

One of our local South Australian natural stone options, this sandstone comes out of the Adelaide Hills. A coarse grain sandstone, which comes out of the ground including a range in colours from light sandy colours to rich brown and blacks.

Natural stone blocks are nominally between 95-110mm thick typically used like a brick as a construction element. Adelaide Hills Sandstone is quarried to order, contact us to find out lead times.
