

SANDSTONE SA BASKET RANGE

Sawn Face Random Lengths, 76, 162, 248mm (H) Blocks, nominal 110mm + protrusion

One of our local South Australian natural stone options, this sandstone comes out of the Adelaide Hills. A coarse grain sandstone, this sawn face option slightly mutes the natural colours that exist in the stone. The sawn face texture includes subtle ribbed, often circular markings left from the blade, giving it a slight texture.

Natural stone blocks are nominally between 95-110mm thick typically used like a brick as a construction element. Basket Range Sandstone is quarried to order, contact us to find out lead times.
