

SANDSTONE CLASSIC ADELAIDE

Split Face Dressed Edge Random Ashlar Veneers, nominal 15mm + protrusion

This stone has a lot to offer; the wavy veining that typifies sandstone as well as the natural colour variation and texture. Not only does the split face add a wonderful softness, but the bolstered edge on this stone also helps frame each piece, defining this stone's random ashlar format. The all-natural colour variation ranges from chalk to mauve, with tans and ochre in between.
