

## **SANDSTONE CRAFTERS WHITE**

Split Face Tumbled Irregular Veneers, nominal 25-35mm

This fresh, light sandstone has a gentle off-white tone with hints of apricots, greys, peaches, and pinks. The subtle tone in this stone turns the energy down, letting the natural shapes and texture step forward as its feature. The split face finish gives the impression of age while the tumbled edges compliment the overall finish and style.
