

TRAVERTINE MOCHA

Enhanced 500 x 500 x30/70mm Drop Edge

This ever-popular travertine has been specifically selected for its stunning light almond cream colour with the advantage of some varied shading through its billowing veining, enhancing the warmth of natural stone. This travertine product has a filled and brushed surface to reduce dirt from settling in the cavities that characterise travertine.

This drop edge coping gives a sturdy contemporary look with the thick (70mm) enhanced finish edge on show.
