Granite Raven Pavers and Coping

Standard format paving come in a consistent size or as a blend of mixed paver sizes. One tends to create organised rhythm in a space, where the other provides variety and movement within a linear structure. Being a natural product, the veining patterns in each paver are unique to each piece, creating a distinct feeling that only natural products can provide.

Laying stone pavers in a stack bond creates formal, contemporary lines. Whereas lay patterns with more mixed interlocking, such as a brick bond or a random coursed bond, breaks up the lines, creating a more relaxed feel.
