Sandstone New Desert Sand Veneers

Our random ashlar stone products are predominantly supplied as a mix of 12 sizes. This stone style forms many of our new and character local buildings, so they really feel at home in South Australia. The mix of sizes and textured finishes creates a beautifully crafted result.

These can either be laid in a random ashlar pattern, with the sizes mixed through to create a heritage reference. Alternatively, a coursed ashlar pattern, with the heights aligned in horizontal rows, creates a linear composition which works well in a contemporary build and won't get lost when applied on narrow sections.

**Veneers:** also known as stone cladding are thin slices of stone which are glued onto a substrate (commonly bricks).
